

Authentication

To access spreadsheets via Google Sheets API you need to authenticate and authorize your application

Steps to Enable API Access for a Project to access google sheets:

1. Head to [Google Developers Console](#) and create a new project
2. In the box labeled “Search for APIs and Services”, search for “Google Drive API” and enable it.
3. In the box labeled “Search for APIs and Services”, search for “Google Sheets API” and enable it.
4. In The google sheets API click on create credentials to create credentials
5. Then select Google Drive API on which api you are using section
6. Then Select Web Server (node.js) in where you will be calling the api form section
7. Select “Application Data” in option what data will you be accessing
8. Select No,I’m Not using them in Are you planning to use this API with App Engine or Compute Engine?
9. Then Select What Credentials do i need?
10. Enter any name to your Service account name in select a role option choose Project as a Editor
11. In key type choose json then download the key
12. And Rename the key as “client_secrets.json”
13. Create a sheet in google sheets named as “resume_data”
14. Open “client_secrets.json” and copy the client_email from it and share the json .
15. Very important! Go to your spreadsheet and share your sheet with your client_email that you have copied from the above steps.

16. Then share is file id. For example

1Gvsv0KbLZn_d6TcZfJio6OcjZ3un3uLdExGzt9W5hkl is the file id of my Sheets url

https://docs.google.com/spreadsheets/d/1Gvsv0KbLZn_d6TcZfJio6OcjZ3un3uLdExGzt9W5hkl/edit#gid=824200460
